MANAGEMENT SYSTEMS

- Productivity and Profit Improvement Programs – PQA facilitator leads the client's team through an improvement project
- Business Excellence Assessments and Implementation – using numerous proprietary and proven assessment techniques, PQA will prepare a confidential assessment report that will identify practical improvements where your company needs to FOCUS its attention. You can choose to implement these improvement opportunities on your own or get PQA to help you.
- Critical Chain Project Management – training and consulting in how to run projects that are 10% to 50% faster or cheaper
- Supervision, Leadership, and Management Training Workshops – training to update the management and leadership skills to meet the high velocity requirements of the 2010's
- Strategic Planning – PQA facilitator leads the Senior Management team through the process of developing your strategic business plan
- Employee and Team Development – training programs to help employees work together in a team environment
- Continuous Improvement Programs – training and facilitation of continuous improvement teams in applying Deming's PDSA process and statistical techniques to improve operational performance and quality levels in all functions of the organization
